EDUCATION

Alfred University

Alfred, NY

Bachelor of Arts in Data Analytics & Computer Science - Double Major | GPA: 3.88/4.0

Expected May 2028

- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Web development Database Systems, Software Engineering, Linear Algebra, Statistics
- **Honors:** AHA! Startup Competition Winner (\$5,000), Presidential Scholarship, Honors Program, Dean's List

EXPERIENCE

Software Engineering Intern

Jun 2026 – Present

FlyRank AI | Python, FastAPI, REST APIs, Testing

Remote

- Engineered Python backend services powering **4 AI-driven web applications**, implementing modular business logic, request validation, and structured response handling with cross-functional product and engineering teams.
- Designed and optimized **6 RESTful API endpoints**, reducing average latency by **40%**; built reusable modules and automated tests that cut duplicated code by **35%** and accelerated feature delivery.
- Diagnosed and resolved **12 production defects** through API tracing, unit testing, and regression testing, reducing recurring service failures by **30%** and improving release reliability.

Undergraduate Research Intern

May 2026 – Present

Alfred University Inamori School of Engineering | Python, TensorFlow, Computer Vision

Alfred, NY

- Developed a modular computer vision application for electronic-waste classification, training MobileNetV2 on **28,000+ images** to achieve approximately **90% validation accuracy**.
- Engineered an end-to-end inference pipeline integrating preprocessing, model prediction, database retrieval, and weighted recovery scoring, improving research processing efficiency by **50%**.
- Partnered with materials engineering researchers to translate recycling requirements into a reusable software workflow for automated component identification and recovery recommendations.

ITS Student HelpDesk Consultant

Sep 2025 – Present

Alfred University | Azure Entra ID, Identity Access, Technical Support

Alfred, NY

- Support production technical systems for **2,000+ users** administering enterprise identity infrastructure, identity access, authentication, and account provisioning through Azure Entra ID in a live enterprise environment.
- Resolve hardware, software, and multi-factor authentication incidents using structured root-cause analysis, ticket documentation, and escalation to maintain reliable service continuity.

Robotics Software Developer

Aug 2023 – May 2025

FIRST Robotics Challenge | Java, Python, Real-Time Systems

Ramat HaSharon, Israel

- Improved autonomous-system accuracy by **35%** by engineering Java control software with object-oriented design, iterative testing, and real-time performance debugging.
- Reduced operational errors by **30%** by developing real-time processing loops that integrated multi-sensor inputs within a fast-paced, cross-functional engineering team.

PROJECTS

Expense Tracker | Python, Flask, JavaScript, SQLite, REST APIs, OAuth, Vercel

- Built a full-stack web application with **8+ user-facing features**, including Google OAuth, session management, budget tracking, automated email notifications, and responsive interfaces.
- Designed **20+ REST API endpoints** and a normalized relational database, enabling reliable data management and cloud deployment through Vercel.

Alfred RAG Assistant | Python, ChromaDB, Groq LLM, Gradio

- Built a retrieval-augmented generation system over a 10-document knowledge base, embedding **47 searchable chunks** in ChromaDB and implementing top-4 semantic retrieval.
- Added grounded generation, source attribution, and strict refusal behavior to limit hallucinations, achieving **80% evaluation accuracy** on representative student questions.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, C, C++, C#, Go, HTML/CSS

Frameworks & Libraries: FastAPI, Flask, React, PyTorch, TensorFlow, Scikit-learn, NumPy

Databases & Tools: PostgreSQL, MySQL, SQLite, MongoDB, ChromaDB, Git, Docker, Linux, Azure, Vercel
